1 Introduction

1.1 About

The biblatex-socialscienceshuberlin style provides the citation and bibliography styles used at the Department of Social Sciences at Humboldt-Universität zu Berlin.

This style is built upon `biblatex-ext`¹ and uses `ext-authoryear` for citations and for the bibliography. Several customisations have been done so far.

1.2 Installation

This style is available on CTAN.² The current release is also available in Mik_{TEX} and _{TEX} live 2018 or newer. If at all possible you should install this style via your _{TEX} distribution (using Mik_{TEX} Console³ or tlmgr for _{TEX} live⁴). If you must install this package manually, get the files from CTAN and install the .bbx, .cbx files preferably to `tex/latex/editiontopoi` of your local or home _{TEX} tree, the other files (`README.md`, `editiontopoi.tex`, `editiontopoi.pdf` and `editiontopoi-examples.bib`) go to `doc/latex/editiontopoi`, you may have to refresh your file name database afterwards, so _{TEX} can find the files.

1.3 License

Permission is granted to copy, distribute and/or modify this software under the terms of the _{LETEX} Project Public License, version 1.3c⁵ or (at your option) any later version⁶. This style is maintained by Lukas C. Bossert (©2018).

2 How to use it

For a general introduction to `biblatex` see its documentation available on CTAN⁷, or have a look at the short `biblatex`-tutorial by Paul Stanley⁸.

Note that the author's/editor's names are colored so far. This will be an option in further releases.
